Dear Gurulakshmi MK,

We have successfully received your prototype for **Solution Challenge 2026: Build with AI**-well done, and congratulations!

Taking an idea from concept to execution is no small accomplishment. You've put in the time, effort, and creativity to build something real, and that in itself is a significant achievement.

What's next:

- **Prototype Evaluations:** Our judging panel is currently stepping into the evaluation phase to carefully review and test the prototypes submitted by all the talented teams.
- **Top 100 Teams Announcement:** We will be announcing the Top 100 teams moving forward on **May 29th, 2026**.

Now that the prototype evaluations have begun, we also wanted to provide clarity on the previously shared evaluation criteria and process that will be followed to evaluate all prototypes.

How Your Prototype Will Be Reviewed		
Step 1	PPT Screening	Your prototype deck is your <i>golden ticket!</i> .
Note: If PPT doesn't meet the mark, we won't be reviewing the Video Demo, MVP Link or Code Review.		
Step 2	YouTube or Demo Video	Only if your PPT Passes, your Video Demo will be reviewed

Note: If Video Demo doesn't pass, MVP Link won't be reviewed

Step 3	MVP Link	Only if your Video passes, your MVP Link will be reviewed
Note: If MVP Link doesn't pass, GitHub won't be reviewed		
Step 4	GitHub Repository	Only if all the above submission

**While you wait for the top 100 announcement, here's something you can do
Showcase your achievement!**

What you've done is not a small step. Registering for a hackathon is the first move toward solving real-world problems, and submitting a working prototype takes it a step further-it reflects true execution.

We've created a digital badge to recognize your participation and prototype submission in Solution Challenge 2026: Build with AI.

[Click Here for the Digital Badge](#)

How to share:

1. Download your badge
2. Post it on LinkedIn/X with a few lines about your prototype
3. Tag @hack2skill and @gdgindia
4. Use tags : #SolutionChallenge and #BuildwithAI

You've built something real-go ahead and share it with your network.

Regards,
Team Hack2skill
